

BLOSSOM NEWS

Happy New Year! It's hard to believe its **January** already, but our New Year's **resolutions** are in full effect. In December the Blossoms learned all about science and what it means to be a **scientist**. Each day we did different science **experiments**; we would ask questions, make predictions, and then conduct experiments to find the **solution**. We were able to see how different solutions changed the shape and appearance of Gummy Bears; how milk and dish soap can make colors swirl; how rain clouds work; and how **germs** can spread like glitter! Now we understand how fast germs spread and how important it is to wash our hands and wash them often. Did we also mention how **AWESOME** our Blossoms did at the Holiday sing-a-long?! We were extremely proud of our Blossom Choir!

This month your Blossoms will be traveling through time and turning into true **Paleontologists** and **dinosaurs**; as we learn all about these Prehistoric animals! We will be exploring the differences between an Herbivore and a Carnivore and we will learn about the most famous dinosaurs including the **T-Rex**, Triceratops, Velociraptor, and many others as well. We will be making our own dinosaurs out of shapes, and our very own **fossils** out of clay. We will even turn into real dinosaurs by the end of the month!

A few **reminders**...

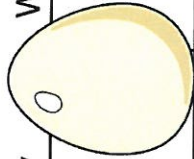

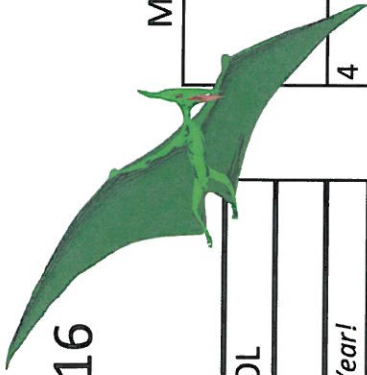

- There is no school on **Friday, Jan 1st**. Have a SAFE & Happy New Year!
- We have had a lot of kiddos bringing toys, stickers, coloring books, etc. to school. We would like to ask you to please keep those belongings at home, as they create a distraction at school and for the risk of them getting lost or ruined. Also, we are having a hard time keeping the cubby area clean with all of our snow gear at school. Please send your child's snow gear in a small bag. This will help keep the cubby area neat and prevent lost or misplaced items.

Thank you and Happy New Year!!

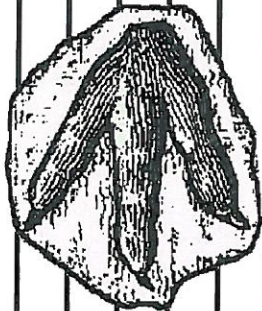

Miss Lauren & Miss Kelley

Jan-16

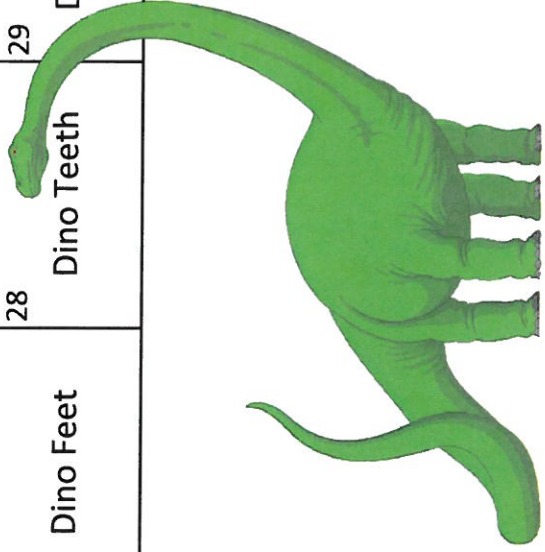

Prehistoric Adventure

Notes:
NO SCHOOL
Jan 1st.
Happy New Year!

Monday	Tuesday	Wednesday	Thursday	Friday
4	5	6	7	1
What is a Dinosaur?	Herbivore	Carnivore	Why are Dino's Extinct?	CLOSED Happy New Year!
11	12	13	14	15
T-Rex	Brachiosaurus	Velociraptor	Spinosaurus	Triceratops
18	19	20	21	22
